## Profile

A creative thinker and curious learner, adept in Software Engineer I'm known among my peers for being highly disciplined, collaborative and hardworking with a strong sense of responsibility.

I'm currently pursuing my MCA degree from Techno Main Salt Lake.

## Projects

**EBook Management System** | JAVA, JSP, SERVLET, HTML, CSS, BOOTSTRAP

**Server:** APACHE TOMCAT 9.0 and **Database:** MYSQL WORKBENCH

Our eBook management system is an all-in-one digital platform for buying, selling, and administering eBooks. Users can easily browse through a vast collection of eBooks, make purchases securely, and even sell their own creations. With a user-friendly interface, secure payment processing, and robust admin capabilities, our system offers a seamless experience for both customers and sellers. Admins have full control over book listings, user accounts, and site maintenance, ensuring smooth operations and a diverse selection of quality content.

## Technical Skills

**Programming Language:** C++, Java, SQL and JavaScript.

**Others skills:** Data structures and algorithms, OOPs, Core java, Dbms, GitHub.

## Education

**Techno Main Saltlake**

Master of Computer Application (SGPA of 7.5)
